SEAN LIM YUAN JIN

Singapore | +65 8606 4770 | seanlim1990@hotmail.com | LinkedIn: linkedin.com/in/seany-lim/

SKILLS & SYSTEMS

- Systems & Software: Software System Testing, Data Validation, Workflow Optimization, SAP (Familiar), Firebase, Git/GitHub, Linux.
- Technical Frameworks: React.js, TypeScript, JavaScript, HTML5/CSS3, Responsive System Interfaces.
- Analytical & Operations: Operational Scheduling, Compliance Checking, Logistical Planning, Incident Response & Auditing, Data Entry Precision.
- Soft Skills: Strong Communication, Cross-functional Collaboration, Analytical Problem-Solving, Team Player.

PROFESSIONAL EXPERIENCE

Frontend Developer | Kyndryl (SingHealth EUP)

02/2025 to Present

- System Optimization & Testing: Transformed complex product requirements and legacy logic into optimized, user-friendly system interfaces actively participated in user workflow validation and system logic testing.
- Workflow Automation: Integrated AI/LLM services and advanced digital tools, leveraging technology as an accelerator to streamline complex data workflows and data processing.
- Analytical Collaboration: Collaborated closely with backend engineering teams to ensure accurate API and data integrations, ensuring seamless and secure cross-system performance.

Senior Administrative Assistant | Chirotherapy

02/2023 to 06/2024

- Rostering & Scheduling: Directed and managed patient workflows, daily operational scheduling, and personnel logistics to ensure optimal daily resource allocation.
- Query Resolution: Acted as a central point of contact to investigate and resolve scheduling conflicts, client queries, and operational bottlenecks with high diplomacy and accuracy.

Cybersecurity Training and Internship | Oeson Learning

08/2024 to 11/2024

- Compliance & Validation: Conducted rigorous system data validation and risk mitigation protocols to protect digital environments.
- Analytical Auditing: Maintained structured frameworks for network scanning and digital tracking to support operational preparedness and compliance monitoring.

Administrative Assistant | Total Health Chiropractic

06/2022 to 12/2022

- Data Integrity: Maintained complete accuracy across high-volume digital client profile records and precise asset data entry, adhering strictly to institutional standards.

Senior Functional Wellness Therapist | Natrahea

09/2020 to 06/2021

- Coordinated multi-tier rehabilitation plans, managed client coordination, and produced cross-team educational media content.

PROJECTS

AUTOAPPLYAI (Google AI Studio & Firebase)

- Application Testing & Logic: Independently engineered and shipped a functional software application from concept to product, demonstrating strong capability in system logic, software testing, and data validation.
- UX & Tracking Optimization: Built an intuitive interface focusing on seamless backend integration via Firebase, analysing user workflows to optimize automated data responses.

Above the Horizon — Premium Airline Web Experience
Next.js · React · TypeScript · Tailwind CSS · Motion · Vercel

Designed and developed an end-to-end premium airline digital experience centred around the Airbus A380, combining cinematic storytelling with interactive journey planning.

- Built a responsive Next.js experience spanning aircraft storytelling, cabin exploration, destination discovery and booking interactions.
- Developed contextual daylight, golden-hour, sunset and night aircraft experiences with destination/local-time-aware behaviour.

- Created responsive destination carousels and an integrated destination-to-booking journey.
- Engineered reusable TypeScript/React components and motion systems for desktop and mobile experiences.
- Optimized media loading, video delivery, responsive imagery and client-side performance through Lighthouse and production profiling.
- Deployed and validated the production application through GitHub and Vercel.

EDUCATION & CERTIFICATIONS

- Graduate Diploma in Digital Forensics and Cyber Security – Aventis Graduate School (2023)
- Technical Coursework: System Logic, UI/UX Systems, Data Frameworks (Code Academy)
- Relevant Systems Orientation: Conversant in complex IT workflows; quick adapter to proprietary platforms like Crew Manager (CM) and SAP
- Google Ai Professional certificate – By Coursera
- GOD's EYE cybersecurity software as a service (Saas) UX template design

  GOD's EYE — Autonomous Vulnerability Detection & Remediation
